

## How Can Hypnosis Help YOU to Change Negative Habits?

Hypnosis is the safest, most powerful method for changing negative thoughts into positive ones. It works by exercising & strengthening your MIND! When you change your thoughts you can effortlessly change your LIFE!

### FACTS ABOUT HYPNOSIS

**SAFE:** You are in control at all times. Hypnosis is a relaxed state of mind and when used therapeutically your mind can open to the specific positive thoughts that will propel you towards healthy habits and lifestyle.

**POWERFUL:** What makes hypnosis so powerful in creating positive changes lies within accessing & exercising the power of YOUR own mind.

**ALL NATURAL:** No medications, No side effects, No fad diets to follow. When you shift your minds' focus, you can shift your habits & choices effortlessly.

## Become ANXIETY & STRESS FREE

Feeling uncomfortable in different situations tends to lead to negative experiences. It creates negative thoughts and stress. However when persistent stress becomes overwhelming, it leads to self sabotaging thought processes and creates anxiety. When this is linked with other negative emotions, it can become an all too familiar part of our daily lives. Our mind learns with repetition. So when experiencing stress/anxiety/fear/frustration, etc over and over, the mind will learn that this is the new "normal". Hypnosis helps to transform your mind to relax again and overcome your negative thoughts. This allows you to once again handle life with more ease, happiness, and peace.

## Become SMOKE FREE

Hypnosis can be powerful in helping people to finally let go and be free of negative habits such as smoking. The primary reason is because at Alive & Free we recognize that it is not just about the habit itself but what CREATED the habit in the first place. Self sabotaging thoughts, negative ways of dealing with or not dealing with stress can all be the foundation of where negative choices begin.

We help our clients to not only let go of these negative thought patterns but to also instill & strengthen positive, health enhancing thoughts. This ensures that the person will let go of smoking and not replace one negative habit with another negative habit like eating in excess.
